Expansion of Manufacturing Personnel

On March 20, 2017, Columbus Hydraulics Company LLC announced the addition of Bob Mills as Vice President of manufacturing today. Most recently Bob was plant manager at Lindsay Corporation and prior to that held a position as Continuous Improvement Manager and multiple progressive roles with Eaton Corporation. Bob's experience and training in more than 25 manufacturing facilities complements strong manufacturing personnel currently in place and will be invaluable as the company positions for growth. Columbus is in the early planning stages of expanding or acquiring new facilities to keep up with expanding customer demand. "We're delighted to be working with Bob and couldn't be happier about his skill set and fit with the culture and values of our organization," commented President, Todd Duren.

Additional Quality Support

On February 27th, 2017, Columbus Hydraulics Company LLC added Jeremy Wax to the Quality staff. Jeremy was brought on as a Quality Engineer to help take the organization to the next level in terms of Quality. Jeremy's role will be to assist in developing or modifying current quality processes as well as continuous improvement implementation of new ideas and processes for the improvement in our quality standards set for our customers. Jeremy was most recently at Camaco as a Quality Engineer for over 11 years before coming to Columbus Hydraulics. Jeremy's experience will absolutely advance the quality opportunities at Columbus Hydraulics. The growth the company expects in the future will certainly be directly attributed to the hard work of our quality group, including Jeremy.
